Finite Element Analysis of Integral Shaft Bearing

bearing is designed in ANSYS software, the journal is ... ANSYS for Meshing and analysis. The analysis by CFD- FSI approach is used in order to calculating pressure profile and temperature distribution. For meshing, the fluid ring is divided into two connected volumes. Then all thickness edges are meshed with 360 intervals. A tetrahedral structure mesh is used. So the total www.ijert.org ...

Analysis of Hydrodynamic Journal Bearing Using Fluid Structure Interaction Approach ... the CFD- FSI analysis is done with ANSYS Fluent and multiphysics modules. For meshing, the fluid ring is divided into two connected volumes. Then all thickness edges are meshed with 360 intervals, and then volumes are meshed with the Hex/Wedge element method. The mesh is carried out using ANSYS ...

Analysis of Hydrodynamic Journal Bearing Using Fluid

A 3-D model of deep groove ball bearing was built by using APDL language embedded in the finite element software ANSYS. Through contact analysis, the changes could be showed in stress, strain, penetration, sliding distance, friction stress among the inner ring, outer ring, rolling elements and cage.
