Poultry housing and management in developing countries

Ospreys (*Pandion haliaetus*) are fish-eating raptors found along shorelines and open marshes in coastal regions. Unlike other raptors that primarily nest in trees, forested habitat is not a limiting factor for the osprey.

Osprey | Migratory Birds | Chesapeake Bay Field Office

A bird nest is the spot in which a bird lays and incubates its eggs and raises its young. Although the term popularly refers to a specific structure made by the bird itself—such as the grassy cup nest of the American robin or Eurasian blackbird, or the elaborately woven hanging nest of the Montezuma oropendola or the village weaver—that is ...
