ATLAS STEELS Stainless Steel Grade Selection Page 3 www.atlassteels.com.au Selection for Corrosion Resistance The selection of the most cost-effective grade for a particular corrosive environment can be a complex

**STAINLESS STEEL GRADE SELECTION - Atlas Steels**

ABSTRACT. Wrought austenitic stainless steels are widely used in high temperature applications. This short review discusses initially the processing of this class of steels, with emphasis on solidification and hot working behavior.

Welding is a fabrication or sculptural process that joins materials, usually metals or thermoplastics, by using high heat to melt the parts together and allowing them to cool causing fusion.

**Welding - Wikipedia**

ABSTRACT. Ferritic-austenitic duplex stainless steels are part of a class of material having a two-phase microstructure, comprised of a ferritic matrix and austenitic islands, with the volumetric fractions approximately the same in these phases.

Climate change is now a major concern. The polar ice caps are reported to be melting and sea levels are rising due to an increase in the average temperature of the Earthâ€™s atmosphere and oceans . Global warming is driven by increasing levels of tropospheric gases that contribute to the so-called greenhouse effect.
