Controlling Design Variants: Modular Product Platforms

Modular product platforms, sets of common modules that are shared among a product family, can bring cost savings and enable introduction of multiple product variants quicker than without platforms.

Doctoral Dissertation - University

Introduced here is the concept of modular design within the product platform approach, intended to increase company efficiency while reducing costs and time to market. "Modularization" is the decomposition of a product into building blocks with specified interfaces. Companies can achieve significant advantages by separating parts that should vary to satisfy customer needs from parts that ...
