Introduction CS556 - Distributed Systems Tutorial by Eleftherios Kosmas 2 Computer Network hosts, routers, communication channels Hosts run applications

Introduction to Sockets Programming in C using TCP/IP

A network socket is an internal endpoint for sending or receiving data within a node on a computer network. Concretely, it is a representation of this endpoint in networking software (protocol stack), such as an entry in a table (listing communication protocol, destination, status, etc.), and is a form of system resource.

Network socket - Wikipedia

Berkeley sockets is a Unix application programming interface (API) for Internet sockets and Unix domain sockets, used for inter-process communication (IPC).
